SUMMARY

Software Engineering Undergraduate and Game Developer with a passion for building creative, user-centric digital solutions. Highly skilled in full-cycle game development and the design of accessible software interfaces. Committed to solving complex technical challenges and developing high-impact applications that bridge the gap between innovation and community needs.

WORK EXPERIENCE

Game Developer Intern, Yunash

2024 May - 2025 May

- Developed and optimized game mechanics, contributing to the successful lifecycle of internal gaming projects.
 - Gained hands-on experience in debugging, version control, and performance tuning within a professional studio environment.
-

KEY PROJECTS

CogniPlay - Final Year Project (Ongoing) | Developer

- Designed and developed a gaming application specifically for Cognitive Monitoring, utilizing game mechanics to track and analyze cognitive performance.
- Implemented data-driven features to provide feedback on cognitive health, showcasing the intersection of health-tech and gaming.

HearLink | Developer (Group Project)

GitHub

- Engineered a communication platform focused on inclusivity for the hearing-impaired.
- Integrated real-time sign language translation and speech recognition features to facilitate seamless video communication.

Tourism Website | Developer (Group Project)

GitHub

- Contributed to a team project developing a tourism website for Sri Lanka. Designed and implemented an interactive tourism quiz, enhancing skills in web development and collaboration.

Fruit Ninja IQ Challenge Game (Unity) | Developer

GitHub

- Created a hybrid experience that integrates fruit slicing with a chess-based IQ challenge for life recovery.

Stack Ball 3D Game (Unity) | Developer

GitHub

- Engineered a fast-paced 3D game focused on optimized physics-based destruction and responsive player controls.

Coffee Shop Arcade Game (Unity) | Developer

GitHub

- Developed an idle management game focused on player-driven service mechanics and efficient order fulfillment in a cafe environment.

Super Mario Bros Game (Unity) | Developer

[GitHub](#)

- Programmed a classic 2D platformer with refined jump-and-run physics, and enemy collisions.

Z Defence Game (Unity) | Developer

[GitHub](#)

- Built a dungeon-crawler survival game featuring integrated combat systems and enemy AI navigation.

CarDash Game (Unity) | Developer

[GitHub](#)

- Developed a fast-paced driving game featuring lateral movement mechanics to navigate through traffic and avoid obstacles.

Epic Prankster Game (Unity) | Developer

[GitHub](#)

- Developed a stealth action game featuring multi-level room environments and strategic shooting mechanics.

Surf-Dodge Game (Unity) | Developer

[GitHub](#)

- Developed a water-based navigation game focused on obstacle avoidance and fluid movement mechanics.

EDUCATION

BEng (Hons) Software Engineering

Sep 2022 – May 2026

- Informatics Institute of Technology (IIT), University of Westminster

Secondary Education

Graduation year: 2022

- St. Thomas Girls High School, Matara, Sri Lanka
 - Passed GCE Ordinary Level (2017)
 - Passed GCE Advanced Level (2021)

EXTRACURRICULAR & LEADERSHIP

Guest Speaker | LEVELSTAIR

- Conducted an introductory Game Development session, educating an audience on industry fundamentals and logic using Construct 2.

Event Organizer | Brain Tech (Walasmulla National School)

- Organized a 2-day technology event (Quizathon & Ideathon) to promote innovation and creative problem-solving among students.

SKILLS

- **Languages:** Java, Python, C#, JavaScript, PHP, HTML, CSS.
- **Technical:** Unity, FastAPI, PostgreSQL, Node.js, Express.js, UI/UX.
- **Soft Skills:** Problem-Solving, Critical Thinking, Teamwork, Adaptability, Time Management.
